Development Plans

The following three Development Plans, and key, are designed to be read in conjunction with Background Research Report and the Master-plan for Tourism Development and Public Land Use in Halls Gap.

The Master-plan outlines possible uses for, and how these uses might tie into, the future evolution and branding of Halls Gap. These suggestions and recommendations are made with the understanding that commercial opportunities proposed by new businesses and investors will ultimately be proposed by these businesses and investors and finalised through negotiation with the town’s key stakeholders and local government authority.

The purpose of this master-plan being to encourage new businesses and investors to Halls Gap, all suggestions and recommendations have been made to show potential for, rather than be prescriptive of, the ways in which the use of public land and the development of new businesses will develop.

The ultimate location of Halls Gap Peak’s Trail Head, which will connect the town to the newly revamped, and broadly promoted, Grampian’s Peaks Trail, will be determined by an additional stakeholder consultation process to be undertaken in conjunction with Parks Victoria - who hold ultimate responsibility for the all Grampian’s Trail Head locations.

It is strongly recommended that any business owners and investors considering commercial development in Halls Gap make themselves known to the Parks Victoria and local government included as a key stakeholder in the Trail Head location consultation process.
